

POSITION. Financial Analyst

WHO WE ARE. Heelstone Renewable Energy is a utility-scale solar developer headquartered in Chapel Hill, NC with expertise in originating, financing, constructing and operating solar photovoltaic projects. Heelstone has developed and achieved commercial operation on 67 solar projects with an aggregate generating capacity of approximately 1.1 GW. Heelstone has partnered with Ares Infrastructure and Power, a subsidiary of Ares Management Corporation (NYSE: ARES), to fund its development platform. For more information, please visit www.heelstoneenergy.com.

POSITION SUMMARY. Heelstone is seeking a recent undergraduate or graduate student who studied finance, economics, statistics, or a similar discipline for a financial analyst position in its Chapel Hill, NC office. This role presents an opportunity to work in the solar financing market with an established participant in the power and renewables industry. You will provide support in all aspects of renewable energy and corporate finance projects including M&A activities and raising and structuring project debt and equity. You will work directly with leading industry participants, including developers, financing partners and investment banks.

RESPONSIBILITIES

- Develop and maintain financial models using multiple different capital structures
- Assist in screening, structuring and pricing acquisitions and project bids
- Prepare analyses for internal investment committee approvals
- Support raising and structuring debt, equity and tax equity for utility-scale solar projects
- Assist in structuring and pricing project divestitures
- Assist in due diligence of project acquisitions and greenfield development opportunities
- Understand historical data sets through publicly available energy pricing to form forward views on pricing
- Assist with market research, analytics and modeling

SKILLS AND PERSONAL QUALITIES

- Excellent financial modeling skills, including high proficiency with Excel
- Background in project finance, investment banking, private equity or leveraged finance
- Exceptional analytical capabilities and attention to detail
- Self-starter that operates well in an entrepreneurial and collaborative environment
- Strong sense of accountability
- Strong organization and management skills
- Ability to prioritize concurrent tasks in a fast-paced environment
- Excellent oral and written communication and presentation skills

EDUCATION. Bachelor's degree in finance, economics, statistics, or a similar discipline
